Cream #FAF8F5

USE FOR: Page background · Main sections · Hero background · Logo background in nav

This is your dominant color — 60% of the site. Everything sits on top of this.

Linen #F0EBE3

USE FOR: Alternating sections · Card backgrounds · Service cards · Testimonial cards · Input fields

Use to separate sections visually without a hard line — gives the site breathing room.

Warm grey #E0D8CF

USE FOR: Borders · Dividers · Card outlines · Nav bottom line · Horizontal rules

Your subtle border color — keeps things separated without feeling harsh.

Taupe #B5A89A

USE FOR: Accent lines · Button hover · Decorative details · Star ratings · Section underlines · Image overlays

This is your accent — use it sparingly for special details. It's what makes the site feel premium.

Greige #8B7D74

USE FOR: Body text · Descriptions · Nav links · Captions · Subheadings · Muted labels

Your secondary text color — softer than espresso, perfect for supporting copy that shouldn't compete with headings.

Espresso #2C2420

USE FOR: Main headings · Logo text · Primary buttons · Footer background · Bold text · CTA sections

Your darkest, most powerful color — use it for things you want people to notice first.
